

Executive Mobile Application

You've been out on the road for hours, or even days on end. Wouldn't it be extremely useful to quickly link into the office network via your mobile phone, see at a glance who has called, select only the most important office phone messages, and listen to them by simply pressing a button?

Add Value to Your Mobile Phone

It happens to all of us, and often at the worst of times. You're out and about on business, and you desperately need all the smarts of your office system to help you fix a problem. But you don't have the phone number of the right technician with you, the person back in the office who could help seems to be away from their desk, and you definitely don't have time to listen to all your landline messages to find the one in which somebody might have left you some crucial information while you were with the customer.

Using NEC's UC for Business (UCB) application called UCB Executive Mobile, you can easily take care of all these issues from your mobile phone – with just a few button clicks. Quickly run through the corporate directory to find any number you need. See at a glance who is active at their desk, or when they're set to return from a meeting. And scroll through your list of office phone messages to select those you should listen to now.

With UCB Executive Mobile, you basically transfer UCB's principal *Unified Communications (UC)* smarts onto your mobile phone – so you can save time, make it easy for yourself and your customers to stay in touch, and handle your communications as effectively as possible.

Key Benefits

UCB Executive Mobile provides you with advanced UC functionality on the one communications device you always carry with you. In case you urgently need to talk to an expert back in the office, you can use *UCB Presence* to see who is at their desk and whether they're on the phone or not. Simply press a button to talk, and you'll avoid those time-wasting telephone tag games, as each call makes contact.

In addition, the *UCB Phonebook* gives you instant access to the company's entire business directory as well as your personal contacts, so you can easily find the contact details of all customers, suppliers or partners – instead of just those you've entered into the 'Names' list on your mobile phone. You'll never need to manually enter phone numbers on your 'Names' list again.

With *UCB Executive Mobile*, you'll have access to a raft of smart Unified Communications features that will help you be more productive while you're on the road.

UCB Executive Mobile – Your smart Connection

- Be more responsive, as you view who has been trying to get hold of you in your Call History list
- Save time as you check all your mobile and landline messages in one place
- Prioritize messages before you listen – view caller details
- When you see a message from a caller you've been waiting on, you'll know it's time to make contact
- Avoid wasting time calling colleagues who are not at their desk – see when they're due back and you'll make sure that each call makes contact
- Avoid the time-consuming task of finding and keying in numbers – use the company directory
- Avoid the confusion and duplication of maintaining multiple contact lists
- Remotely control your availability information, to tell callers when you're next able to be contacted
- Increase your personal efficiency

- Achieve greater productivity while you're away from your desk
- Do better business, more quickly
- With *UCB Executive Mobile* you are always in control of your communications – even when you're out

Features

The *UCB Executive Mobile* functionality lets you use your mobile phone to remotely access your *UCB Desktop* and other applications, via a web address.

- Interface with your *UCB Mailbox* to view your voice messages summary (New / Read / Saved)
- See who called while you were unavailable and call them back instantly – just press a button
- View your Call History (Missed / Recent)
- Use *UCB Executive Mobile* to select or update your *UCB Presence* profile, including your schedule and expected time of return
- Access the *UCB Phonebook* to look up and dial numbers in either your personal or company directories
- Access *UCB Presence* to check your Buddy List and check the availability of your colleagues back in the office. You'll only call them when you know they are free
- Use your Buddy List or the *UCB Phonebook* to request a callback. Press a button to ask your contact to call your default mobile number or another number

Simply log in, during a quiet moment, and check who has been trying to get hold of you

Required Modules

Our UCB Executive Mobile application is an 'Early Introduction' module. It is currently supported on Sony Ericsson P990 and Nokia N95, but is designed to work on any mobile with the s60 Feature Pack 3 operating system, such as the Nokia E Series and Nokia N series. Development is under way for the Windows® Mobile and BlackBerry® platforms.

Each UCB Executive Mobile user requires one of the following applications*:

- UCB Executive Desktop – UCB Executive Mobile was designed to fully complement UCB Executive Desktop
- UCB Agent Desktop
- UCB Executive Outlook®

Licensing

UCB Executive Mobile is a PBX platform generic application. A license is required.
